Art Unit: 1731

1. Claims 16-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 16 and 32 are indefinite in that the limitations relating to the determination of the shrinkage factor (f) are not clearly related to the limitations of the claim. For example, claim 1 recites that ρ_R is the relative density of "a prepared blank" and later refers to "a blank of porous ceramic material" but does not define a relationship between the blanks. Further, claim 1 defines ρ_s as "the achievable relative density after sintering" and later recites "dense-sintering the design form of porous ceramic material" but does not relate the "densities".

Further, the phrase "achievable relative density after sintering" used in claims 16 and 32 is indefinite in that the metes and bounds of this phrase cannot be readily determined. The density after sintering depends on many factors not specifically recited in the claims (e.g. ceramic composition, particle size, sintering temperature, sintering time, sintering pressure).

Claims 1 and 16 are indefinite in that they appear to recite that the enlargement factor is determined independently of the blank of porous ceramic material. This is contradictory to the specification which recites that an individual enlargement factor for each blank is determined even if they are made from the same material (see e.g. page 8, third paragraph).

In claim 16, line 12, "direction" should be changed to ** directions **.

In claim 32, line 12, "direction" should be changed to ** directions **.

In claim 32, line 18, "cease" should be changed to ** ceasing **.

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
